

Environmental policy

O-Bank believes that only by coexisting with the environment can we create a better world for the next generation.

Our company is committed to providing corporate financial business and personal financial business services, and hopes to contribute to environmental protection through a multi-pronged approach. In order to fulfill the responsibility of protecting the environment, we promise to do the following:

- Enable, effective use and reuse of resources.
- Achieve waste reduction and re-resource promotion.
- Adopt green products, import energy-saving equipment, and build green energy.
- Environmental protection activities, pollution prevention activities, continuous improvement promotion.
- In addition to complying with related laws, regulations, and agreements, we have also established independent environmental protection policies to continue to push forward.
- Develop digital banks and strive to achieve the goal of symbiosis between technology and the environment.
- The company's development and profitability can achieve sustainable business and environmental operations under the premise of environmental protection.
